

Following Success of NAB 2013, Livestream Releases Studio™ version 1.2

Free update available for all existing customers; Livestream Studio™ HD50, HD900 now shipping

NEW YORK, NY – APRIL 25, 2013 – Today, [Livestream \(livestream.com\)](http://livestream.com) unveils [Livestream Studio™ Software V 1.2](#), available for free evaluation download today and providing free automatic updates for all existing customers. Following the success of the company's presence at NAB Show 2013, Livestream is now shipping Livestream Studio™ HD50 and HD900. The [Livestream Studio™ HD1700](#) is scheduled to ship May 15, 2013.

Furthering its goal to democratize the live video production, the company has leveraged its presence at NAB and relationship with [1 Source Video](#) and other international distributors, to create a network of resellers around the world to increase availability of the Livestream Studio™ family of broadcast-quality live production switchers.

New features of the Livestream Studio™ v1.2 available to all software and hardware customers via automatic software update:

- Picture in Picture: up to 5 live picture in picture sources, with cropping and opacity
- Wipe transitions with feathering, symmetry and positioning option
- Lower end to end latency for in-venue screen applications. (Experimental feature available in settings panel).
- Graphics Module upgrades:
 - Dynamic countdown, clock and timer
 - Dynamic image feature allowing external processes or users to update image file and have it automatically update on the program output
 - Support for undo in template designer
 - Support for multi-line text
 - Support for text auto sizing
 - Opacity & background colors for text
- Media Module upgrades:
 - Audio playback support (MP3 and WAV)

- Streaming Module upgrade:
 - o Integrated support for Zixi™ Internet transport protocol. Easily stream broadcast-quality video over any distance to Zixi Broadcaster. More information on Zixi is available at <http://www.zixi.com/>
