

Livestream for Government

Perfect for government and political organizations of any size.

Photo taken during the City of Chicago Mayor's Office Live event, broadcasted on Livestream.

Extend Your Campaign

Livestream lets you connect in full transparency with your community during events, such as public announcements, political campaigns, press conferences, or town hall meetings. Constituents, supporters, and voters can watch on any device, including desktops, tablets, mobile devices, and Roku-connected TVs.

"Livestream has been tremendous in facilitating the Chicago Mayor's Office's ability to connect with residents. Mayor Rahm Emanuel visits organizations and holds events all over the City of Chicago, and with Livestream's easy-to-use platform and embedding capability, Chicagoans can just go to the City's website from any device and view the mayor's events live in real time."

Ankur Thakkar - City of Chicago Office of the Mayor
